Discussion Session & End of Course

computer graphics training

The Adobe® Creative Suite® is the ultimate tool for creative web and print professionals, offering a complete design and publishing solution for both print and the Web. It combines the latest full versions of some of the industry's most advanced software, all now with a new streamlined user interface, time-saving design and impressive integration..

In this seminar you will learn all the key new features in the products within the Creative Suite, with a hands-on walk through of how they work even more seamlessly together. This is the ideal quick start guide to getting the most from the new features in the various applications.

With all those new applications crossing so many boundaries, Adobe has created several versions of the Creative Suite - we help you select the most appropriate for you.

Course prerequisites: Basic knowledge of operating systems and earlier versions of Creative Suite.

Rates include Refreshments and CD with trial versions of the new suite.

Recommended duration: 1 Day

Who Should Attend?

Designers, pre-press professionals, production managers, Web designers and anyone who wishes to keep their skills up to date with the latest versions of this powerful suite.
